Mr. Blatter:

In December, I came to you with a request for information on obtaining insurance coverage for the Cal Poly Amateur Radio Club (CPARC) to place equipment and carry out club activities on Tassajara Peak. You informed me, after speaking with ASI's insurance carrier, that the cost to indemnify Steven Smith would be approximately \$130 per year. Our club has voted that this amount is not unreasonable, and we would like to obtain such coverage effective as soon as possible. Please proceed with coverage for our club, and contact me as soon as possible when a letter of indemnity is available from the insurance agency. I have enclosed a copy of my previous letter for your convenience.

Sincerely,

Kirk J. Smith, President
Cal Poly Amateur Radio Club

cc: Dan Malone (Staff Advisor to CPARC)

1871
The first of the year
was a very dry one
and the crops were
very poor.

The second of the year
was a very wet one
and the crops were
very good.

The third of the year
was a very dry one
and the crops were
very poor. The fourth
of the year was a very
wet one and the crops
were very good. The
fifth of the year was
a very dry one and
the crops were very
poor. The sixth of the
year was a very wet
one and the crops were
very good. The seventh
of the year was a very
dry one and the crops
were very poor. The
eighth of the year was
a very wet one and
the crops were very
good. The ninth of the
year was a very dry
one and the crops were
very poor. The tenth
of the year was a very
wet one and the crops
were very good.

The year 1871 was a very
dry one and the crops
were very poor.

Mr. Blatter:

The Cal Poly Amateur Radio Club (CPARC) has obtained permission to place radio equipment at the electronics site on Tassajara Peak, within the Los Padres National Forest. This site is owned and managed by the United States Forest Service.

Steven Smith, a Cal Poly alumni and local community member, is a permittee at the Tassajara Peak site, at which he has placed a building to house electronics equipment. He has graciously offered to allow the Cal Poly Amateur Radio Club to place radio equipment in his building. This would afford the CPARC improved radio coverage for all of its activities, including emergency disaster communications support.

To protect Mr. Smith from liability, he has requested that the CPARC members working at the site be covered by their own insurance, for both accidental injury and death, as well as liability coverage in the unlikely event that club equipment causes damage or injury/death to others. He would like a statement that he is "held harmless" and "indemnified" against any of the clubs activities, members and equipment.

The activities to be performed at the site by club members are the same as those currently in practice on the Cal Poly campus by CPARC members, and include the installation and repair of radio receivers and transmitters, installation of antennas and antenna masts, and the maintenance of the aforementioned equipment and their related parts.

The Cal Poly Amateur Radio Club seeks a letter of indemnification and a certificate demonstrating our coverage that we may forward to Mr. Smith, so that we may proceed with our project. Additionally, the club seeks guidance from ASI and their insurance carrier regarding possible coverage

Mr. Blatter:

The Cal Poly Amateur Radio Club (CPARC) has obtained permission to place radio equipment at the electronics site on Tasmanian Peak within the Los Padres National Forest. This site is owned and managed by the United States Forest Service.

Steven Smith, a Cal Poly student and local community member, is a member of the Tasmanian Peak site, at which he has placed a building to house electronic equipment. CPARC has requested that the CPARC be allowed to place radio equipment at this building. This would allow CPARC to provide emergency communication services, including to provide aid from hiking. He has requested that the CPARC members working at the site be covered by their own insurance for both accident injury and death, as well as liability coverage in the unlikely event that club equipment causes damage or injury/death to others. He would like a statement that he is "held harmless" and "indemnified" against any of the club activities, members, and equipment.

The activities to be performed at the site by club members are the same as those currently in practice on the Cal Poly campus by CPARC members, and include the installation and repair of radio receivers and transmitters, installation of antennas and antenna masts, and the maintenance of the aforementioned equipment and their related parts.

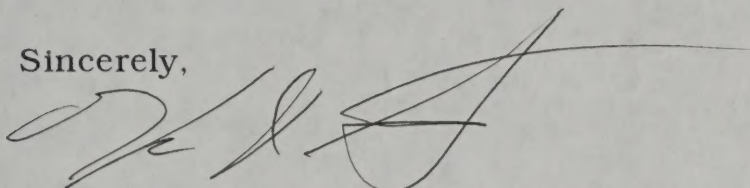

The Cal Poly Amateur Radio Club seeks a letter of indemnification and a certificate designating our coverage that we may forward to Mr. Smith, so that we may proceed with our project. Additionally, the club seeks guidance from ASI and their insurance carrier regarding possible coverage

of associate club members, including alumni of Cal Poly, who are not currently enrolled as full-time students at Cal Poly, but are active resources within our club. We would like to know if these people would be covered by our existing insurance as chartered club at Cal Poly, or if additional coverage must be purchased. If additional coverage must indeed be purchased, and it is available from ASI, we would like information on the costs involved with adding non-students to the policy.

If you require additional information, please telephone my residence at (805) 544-7003.

Sincerely,

A handwritten signature in black ink, appearing to read 'Kirk J. Smith', with a long horizontal flourish extending to the right.

Kirk J. Smith, President
